Grading key: A student's grade point average (GPA) is computed by dividing the quality points earned by the hours attempted. GPAs reported on BJU transcripts prior to the completion of a degree program are based on credits attempted and quality points earned at BJU only. Once an undergraduate degree has been conferred, the GPA is calculated on the basis of the total hours attempted and quality points gained, including transfer work. GPAs reported on associate and graduate transcripts reflect only BJU work.

Quality points are computed on a four-point scale. Prior to June 1, 1986, the University was on a three-point scale. On June 1, 1986, all records of currently enrolled students and students enrolled after that period were converted to the four-point scale. This transcript indicates the current four-point scale.

Grades of P, Cr, Au, W and WF are not included in GPA calculations.
